Operation and Disassembly

Processing Power

Drill:

- 8 Mhz clock
- 8 channel 10-bit ADC
- 6 PWM channels
- Multiply 2 cycles

Calculator:

- 6 Mhz clock

Here is a list of how many clockcycles the z80 instructions take.

Mnemonic	**Clock**	Siz	OP-Code
ADC A,(HL)	7	1	8E
ADC A,(IX+N)	19	3	DD 8E XX
ADC A,(IY+N)	19	3	FD 8E XX
ADC A,r	4	1	88+rb
ADC A,N	7	2	CE XX
ADC HL,BC	15	2	ED 4A
ADC HL,DE	15	2	ED 5A
ADC HL,HL	15	2	ED 6A
ADC HL,SP	15	2	ED 7A
ADD A,(HL)	7	1	86
ADD A,(IX+N)	19	3	DD 86 XX
ADD A,(IY+N)	19	3	FD 86 XX

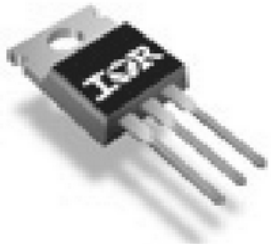
The TO-220 package is universally preferred for all automotive-commercial-industrial applications at power dissipation levels to approximately 50 watts. The low thermal resistance and low package cost of the TO-220 contribute to its wide acceptance throughout the industry.

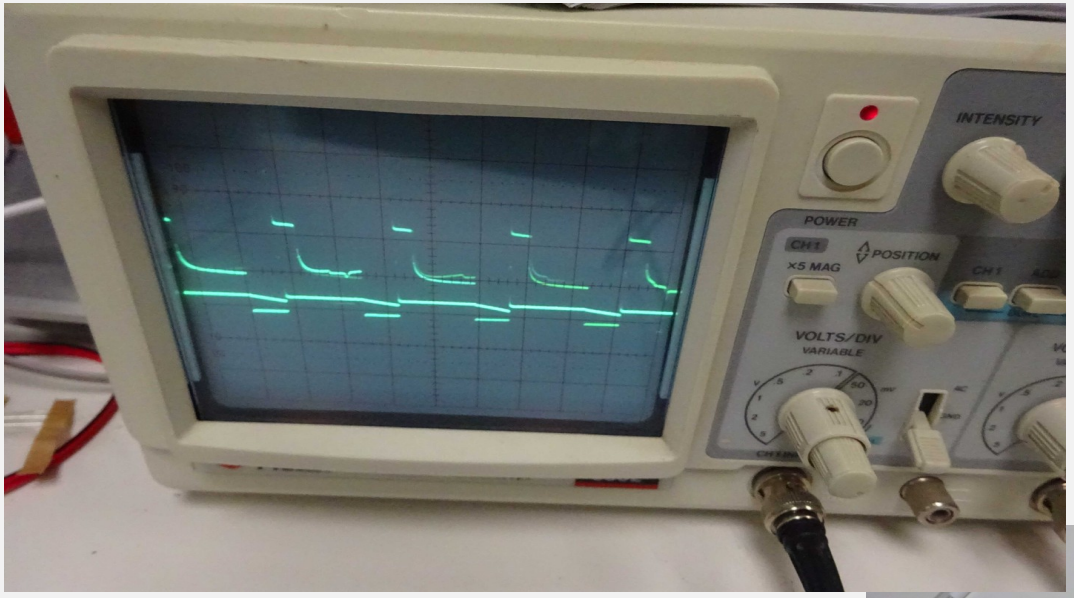


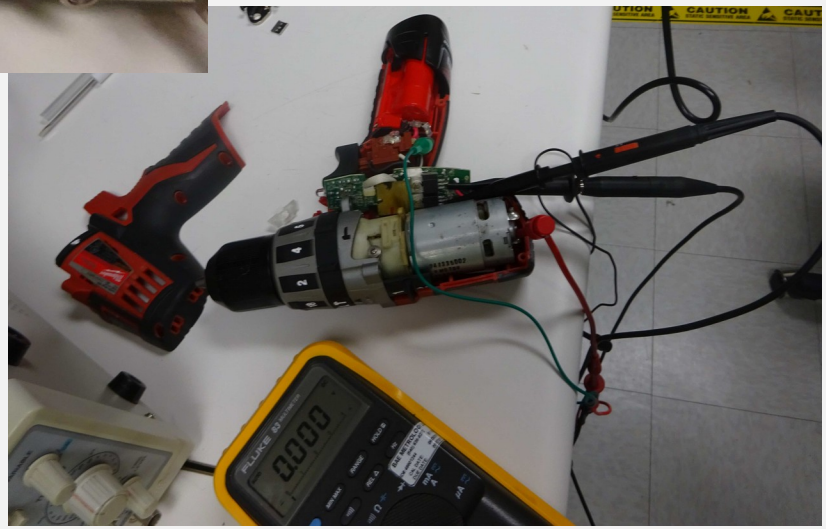
TO-220AB

Absolute Maximum Ratings

	Parameter	Max.	Units
I_D @ T_C = 25°C	Continuous Drain Current, V_{GS} @ 10V	202⑥	A
I_D @ T_C = 100°C	Continuous Drain Current, V_{GS} @ 10V	143⑥	
I_{DM}	Pulsed Drain Current ①	808	
P_D @T_C = 25°C	Power Dissipation	333	W
	Linear Derating Factor	2.2	W/°C

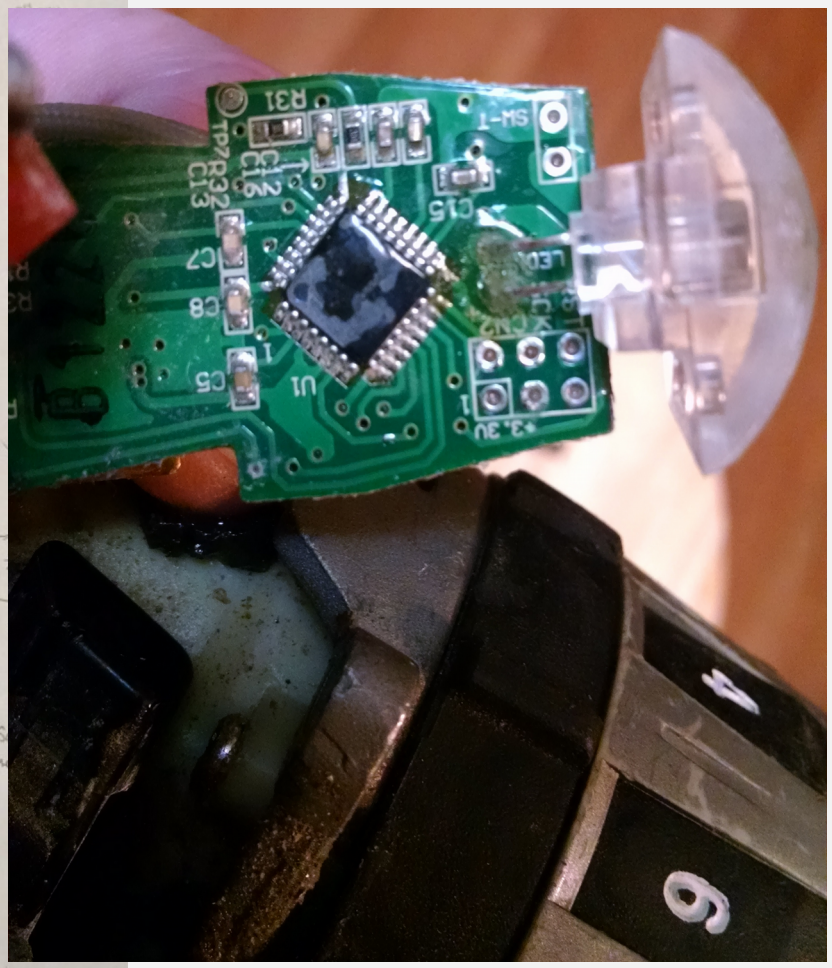
Reverse Engineering Hardware





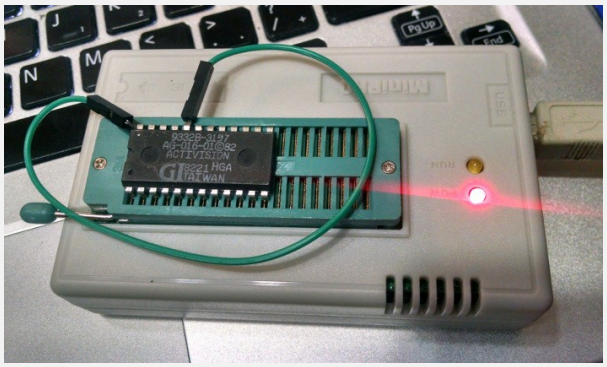
Microcontroller

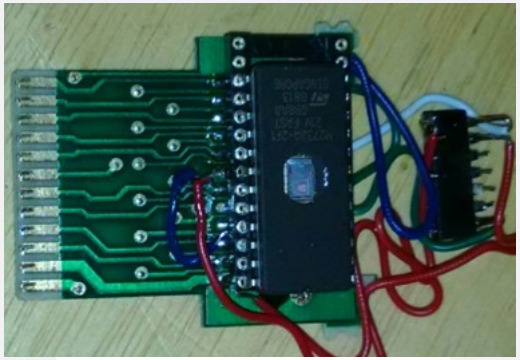
- ATMega88P
- 32 pin
  - Front LED
  - 4 Power LEDs
  - 2 Mosfets
  - Mosfet Temp
  - Battery Temp
  - Battery Voltage
  - Trigger Pot
  - 4 Comm port
  - “enable” pins

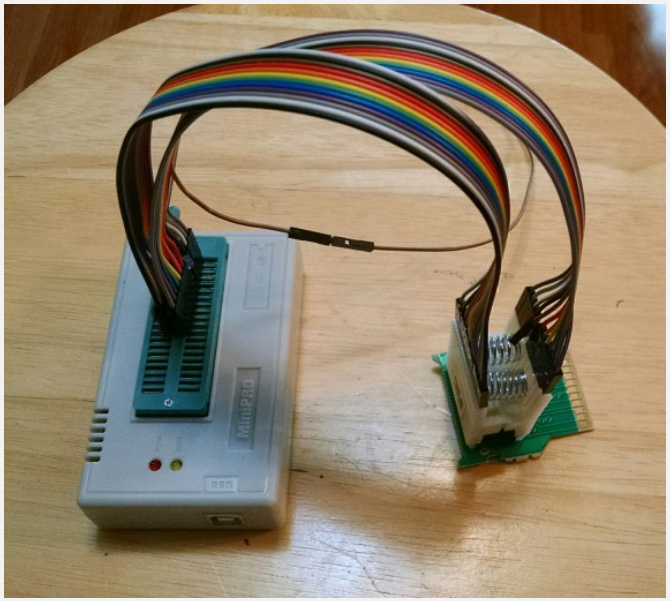


Memory Review

- RAM (rw, volatile)
- Masked ROM
- PROM (otp)
- (uv)-EPROM
- EEPROM
- FLASH



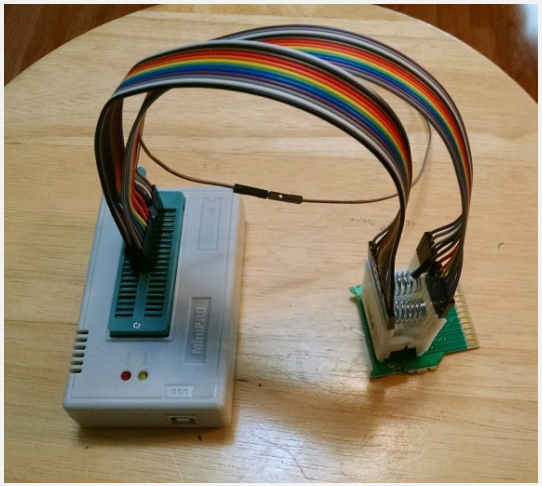




ATMega88P Memory

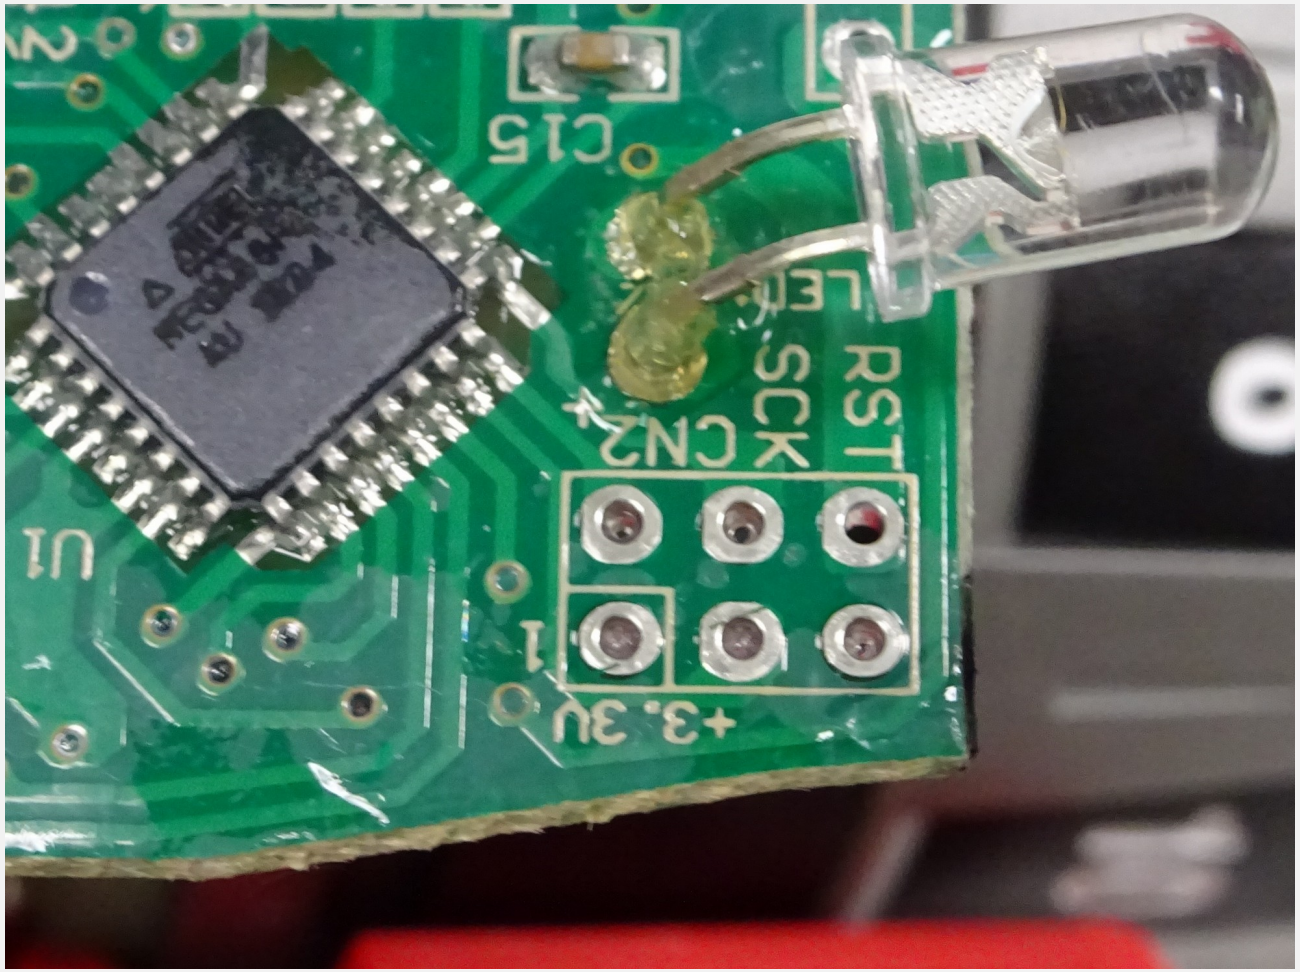
- EEPROM
  - 512 Bytes
- RAM
  - 1024 Bytes
- FLASH
  - 8096 Bytes
- FUSE
  - 2-3 Bytes

All ISP (in system programming capable)

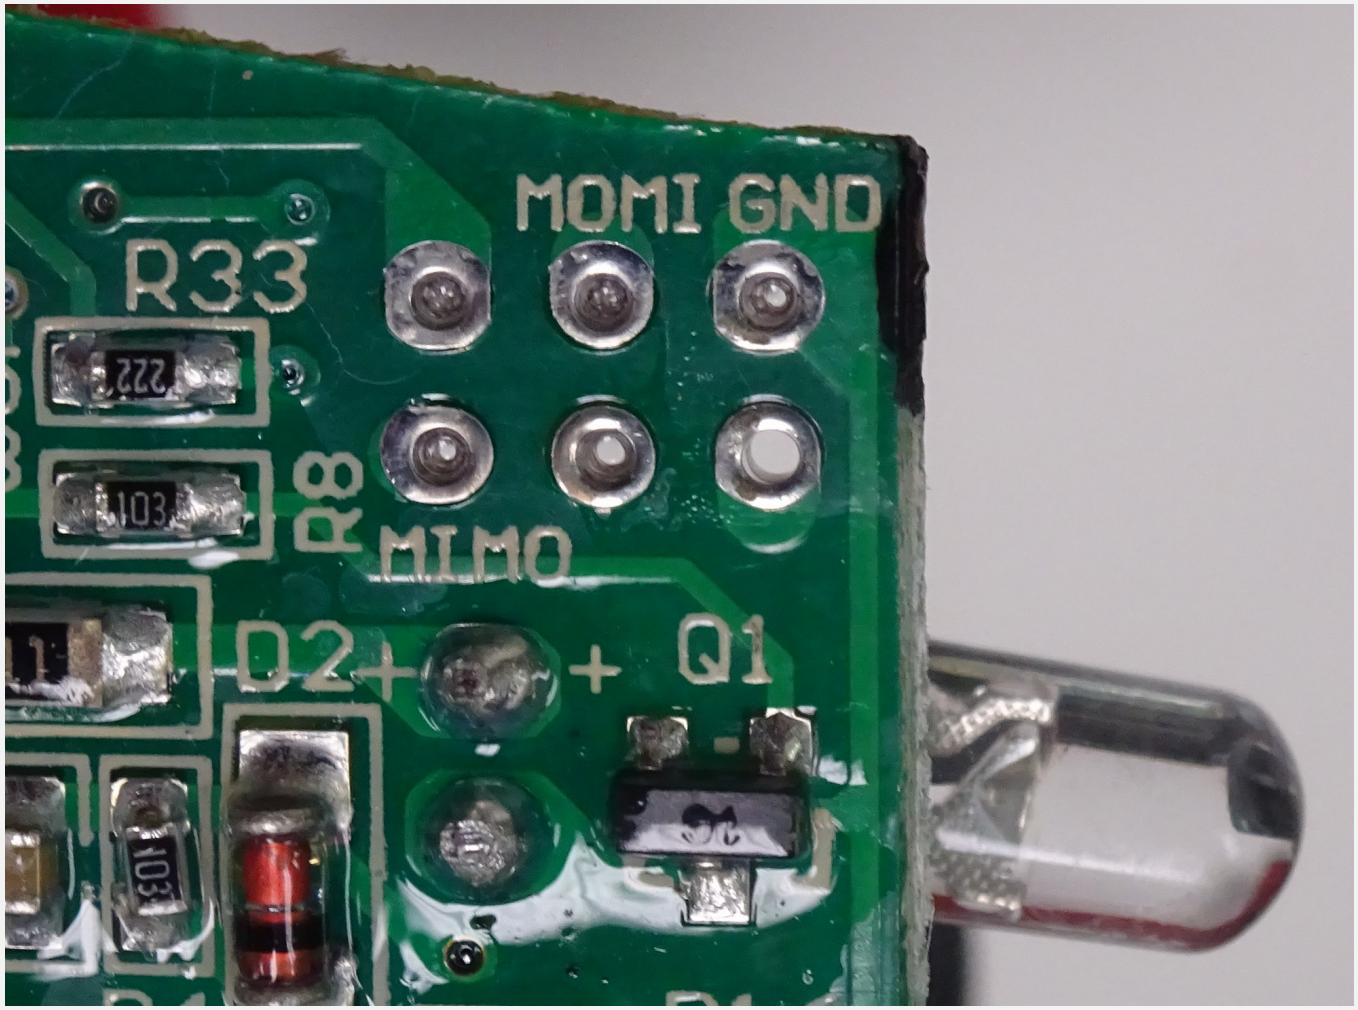


SPI port?

- 3 of 6 pins labeled



SPI port backside



Build Programmer

- Teensy
- avrisp
- 3d printed case
- avrdude

Name that tune

Impractical attack ?

- Air Gap – no attack path
- No financial consequences
- No effect on other systems
- Example of firmware in unexpected places

Supply Chain

- Interdiction

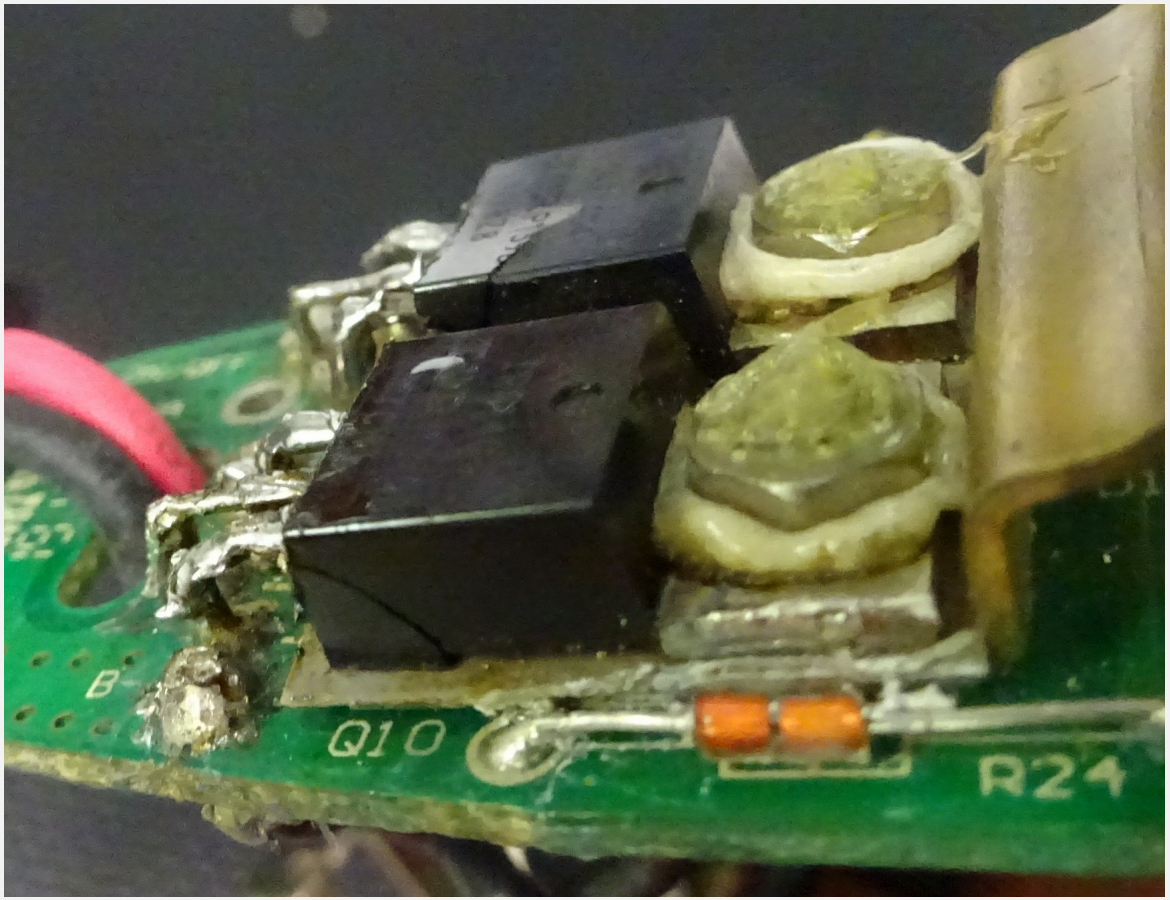
  “Professionally made in China by Milwaukee Electric Tool, PRC”

- Physical access attacks
- Air gapped

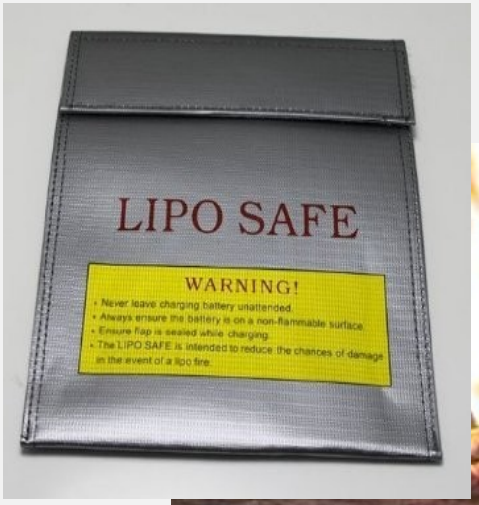
MOSFET Magic Smoke

MOSFET Specs

- 202 Amps continuous
- 808 Amps pulsed
- Un-software-modified e-bay purchase



Thermal Protection Override

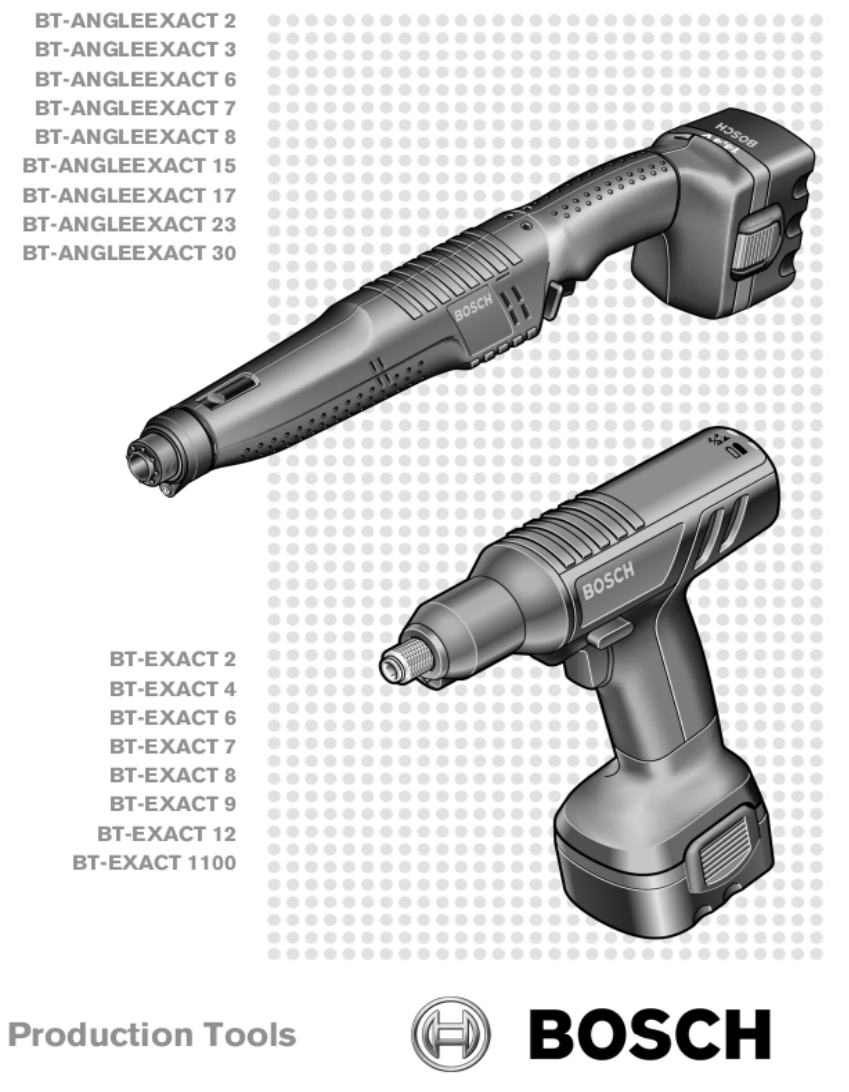


FoxGuard Solutions®

Impractical attack ?

- Air Gap – no attack path
- No financial consequences
- No effect on other systems
- Example of firmware in unexpected places

Airgap ?



"Without access point EXAConnecT, screwdrivers of the series BT-EXACT and BT-ANGLEEXACT cannot be put into operation: ***The screwdrivers are locked when they are delivered and can be unlocked only by access point EXAConnecT. "***

"The Bluetooth EXACT Cordless Screwdriving system thinks for itself. The BT-EXACT tool takes its commands from the EXAConnecT controller, which stores the work in progress in real time. ***The system can talk to and take commands from external devices like a PLC... "***

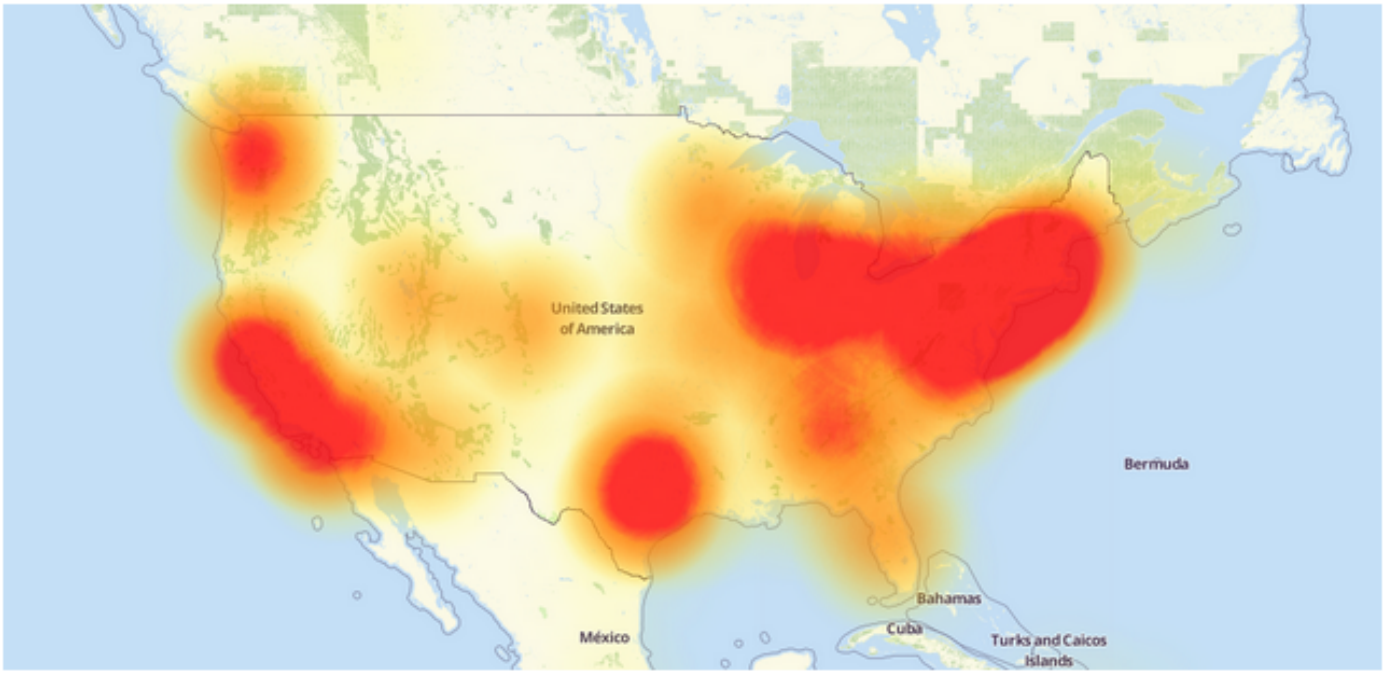
Blame the Internet of Things for today's web blackout

Flashpoint says hacked cameras and routers enabled a Mirai botnet to take out major websites on Friday.



Level3

Impractical attack ?

- Air Gap – no attack path
- No financial consequences
- No effect on other systems
- **Example of firmware in unexpected places**

Software vs. Firmware

- Firmware – noun -Permanent software programmed into a read-only memory
- Firmware is software
- It's not magic
- It's most often modifiable

By Christiaan Colen

- “Firmware” deserves all the security protections we provide for “software”
- Monta's Rule of thumb - If it “plugs in” or “has batteries” it's running firmware (and is programmable)
- Never say “Firmware” again

Tool Analysis

- Heatsinks
- Thermal sensors
- Conformal coating
- Not making firmware “write only” is a plus

- Publish hash for firmware
- Programming header makes it easier for me to verify the firmware on your device

Existing tools and strategies to mitigate these threats

Charger

- There is more firmware out there that you realize
